## Designing user-oriented plastic enclosures and tuning knobs

The rapid development of progressive electronification allows a practically inexhaustible variety of different applications. Their efficiency and complexity are equally varied. It is then a question of taking sufficient account of the expectations and capabilities of the users - on the one hand because of their systems of values, on the other hand for easy-to-understand operability. OKW plastic enclosures and tuning knobs make a special contribution here thanks to their aesthetic design and their functional approach. Find out for yourself.

### Focused on

Two new enclosure ranges:  
[BLOB](#) and [CARRYTEC](#)

Product supplements:  
[Installation assembly kit for INTERFACE-TERMINAL](#)  
installation assembly kit with elegant high-gloss design frame in off-white, black or silver.  
[ERGO-CASE XS](#) - new enclosure size XS for miniaturized components. With intermediate ring in different versions. Comfortable to carry round your neck, wrist or with hand strap.

[Enclosures in special material and special colour from one piece! Try us out.](#)
